What's On The Menu Data Sheet

List each organism in your EcoColumn, including any "newcomers" since you first stocked it. Your "Taking Inventory" Data Sheet may be helpful in doing this. For each organism, identify its source(s) of energy and classify it as a producer, consumer, or decomposer. Use this data to construct a food web for your EcoColumn on the Food Web Chart.

Organism	Energy source(s)	Producer, consumer, or decomposer?
