

Translating Equations Line of Learning

Name: _____

My 3rd period did not learn how to solve equations until Friday, a day later than you guys learned equations...meaning they will be ready for this lesson tomorrow...

Describe how you would explain to my 3rd period class how to read, annotate, translate, solve and then double check their work when solving one step equations from real world scenarios. Please use the problem below as a specific example in completing your Line of Learning.

Problem: Mr. Assan works for the North Hills Regal Cinemas and has worked there for a really long time now! He had 492 tickets left after selling tickets for the upcoming hit movie. He started with 2,009 tickets to sell total. How many tickets did Mr. Assan sell?
